11.4 Policies	V1pLWRP-370 V1pLWRP-401	52233 52233	Oppose	Reject	This submission point asks for the replacement of Policies 11.4.6 to 11.4.17 and Policies 11.4.21 to 11.4.32. We have reviewed the provisions in the light of that request, with a view to accepting any that would (having regard to the effectiveness and efficiency of the body of provisions), be most appropriate for achieving the objectives of the LRWP (taking into account the benefits and costs of the environmental, economic, social and cultural effects anticipated from the implementation of the provisions and risks of acting or not acting), and contribute to a coherent body of provisions that would assist the CRC to carry out its functions in attaining the purpose of the RMA. In the result, we do not recommend as such any of the specific amendments requested. Without tediously listing each, we consider that those we do not recommend would not contribute to making the provision a coherent measure that would assist the CRC as intended.

These submission points ask for retaining, deleting, or variously amending, Rule 11.5.12. We have reviewed the provision in the light of all those requests, with a view to accepting all that would (having regard to the effectiveness and efficiency of the body of provisions), be most appropriate for achieving the objectives of the LRWP (taking into account the benefits and costs of the environmental, economic, social and cultural effects anticipated from the implementation of the provisions and risks of acting or not acting), and contribute to a coherent body of provisions that would assist the CRC to carry out its functions in attaining the purpose of the RMA. In the result, we recommend some of the amendments requested and do not recommend others. Without tediously listing each, we consider that those we do not recommend would not contribute to making the provision a coherent measure that would assist the CRC as intended. The amendments we recommend are evident in the marked-up version of the Plan in Appendix B to this report.
