- a. Includes stream depletion assessment
- b. Ms Johnston either assumed that this is harvested water and should not be included, Rule 8 of WRP, or that it was to be withdrawn;
- c. I have only included the irrigation volume (577,500) plus the stock water (157,680). Ms Johnston has included the dammed volume (413,000).

CRC070328 has been withdrawn. Ms Johnston's evidence was finalised before this consent was withdrawn. She had allowed 228,900 cubic metres.
