ACTION	INFO

Dear Sir/Madam,

RE: CENTRAL PLAINS WATER SCHEME
NOTICE OF FURTHER DIRECTION

In response to the letter of further direction of the Commissioners, we the Directors/Owners of Dunfield Farming Ltd, would like to extend our absolute and unconditional support for the Central Plains Water Scheme.

As our property will be directly affected by the main headrace and secondary canal (reference TP2), we would request if possible that the following points in relation to Dunfield Farming Ltd be considered carefully before consents are issued:

1. The main headrace will effectively land lock two thirds of the property we would request at least one or more crossings of a minimum width of twenty metres over the main canal.
2. As the secondary canal (reference TP2) will also bi-sect the property and following previous discussions with Central Plains Water Engineers we would like the possibility of piping this canal to be investigated further. Failing this, realignment of this canal to the boundary area would be satisfactory.

Yours faithfully,

RODNEY BOOTH

ROSS MANSON
