## Notes for Tables

This report presents the allocation and priority tables for Rule 2, Table 3 of the Waitaki Catchment Water Allocation Regional Plan for applications at this hearing.

### Instantaneous allocations and priority (Rule 2, Table 3)

The purpose of these tables is to:

1. Present the instantaneous rate of water allocated to existing resource consent holders for each waterbody where there is an application for a water permit
2. Present the instantaneous rate of water sought by applicants at this hearing, in priority order. Priority is determined in accordance with the decision by Commissioner Peter Skelton dated May 2008. Priority is not relevant where an allocation limit is not exceeded.

#### **Notes for all tables**

Where there is an allocation limit specified in the plan, this is identified at the top of the table.

The column entitled 'state' identifies whether a consent is 'existing' or an 'application'. Applications are identified as being either a 'new' application or a 'replacement' application. Note that replacement applications may be either a straight replacement or seeking an increase or decrease in allocation. This is not identified in these tables but is discussed in the s42A report for each application.

Where an application is for a replacement consent, the consent that the application is replacing is not included in the existing allocation because the consent itself has expired, although the activity may be allowed to continue in accordance with section 124 of the Resource Management Act, until such time as a decision is made on the replacement application. In making a decision on any replacement applications, Policy 28 of the Waitaki Catchment Water Allocation Regional Plan states that the consent authority will maintain the inclusion of the consent, if granted, in any allocation limit and priority band on the water body of concern.

## Instantaneous allocations and priority for Rule 2, Table 3 of WCWARP

### Table 3(i) High Natural-Character Water Bodies

*Allocation limit of 10% of MALF of water body as assessed by CRC*

#### Cass River

Consent application number	Activity type	Consent holder/ Applicant name	State	Date received	Notifiable date	Max rate of abstraction or diversion to include (l/s)	Max rate of abstraction or diversion not to include (l/s)	Running total (l/s)	Comments
CRC052501	SWDIVERT	Glenmore Station Limited	Replacement application	04/03/05	15/08/05	230		230	
							<b>Subtotal for applications</b>	<b>230</b>	
							<b>TOTAL (existing + applications)</b>	<b>230</b>	

#### Mistake River

Consent application number	Activity type	Consent holder/ Applicant name	State	Date received	Notifiable date	Max rate of abstraction or diversion to include (l/s)	Max rate of abstraction or diversion not to include (l/s)	Running total (l/s)	Comments
CRC012408.1	SWDIVERT	Star Holdings Limited	Existing			85		85	
							<b>Subtotal for existing</b>	<b>85</b>

## Table 3(x) All water bodies to which the Ahuriri River National Water Conservation Order (WCO) applies

**NB: Ahuriri WCO includes Ahuriri River main stem and Omarama Stream**

### **NBB: Ahuriri River allocation**

1. Up to 0.6 cubic metres per second when flows are between 10 and 15 cubic metres per second;
2. Up to 2 cubic metres per second when flows are between 15 and 25 cubic metres per second; and
3. Up to 3 cubic metres per second when flows are greater than 25 cubic metres per second.

**Omarama Stream = no allocation**

There are tributaries of the Ahuriri River to which the Ahuriri River WCO does not apply. These are included below under the row (xxii) – all other rivers and streams section.

Consent application number	Activity type	Consent holder/ Applicant name	State	Date received	Notifiable date	Max rate of abstraction or diversion to include (l/s)	Max rate of abstraction or diversion not to include (l/s)	Running total (l/s)	Comments

### Table 3(xxii) All Other Rivers and Streams

Each tributary waterbody subject to an application which falls within the 'all other rivers and streams' category of Table 3 has been identified in the tables below. The tables are grouped together in terms of the water body for which they are tributaries. Each table includes the maximum instantaneous rate of diversion or abstraction for existing consents, including connected groundwater, followed by the maximum instantaneous rate sought by all applications on that waterbody.

#### Ahuriri River Catchment

Please note these are in addition to those resource consents considered under Table 3, row x of the WCWARP.

#### East Branch Ahuriri

Consent application number	Activity type	Consent holder/ Applicant name	State	Date received	Notifiable date	Max rate of abstraction or diversion to include (l/s)	Max rate of abstraction or diversion not to include (l/s)	Running total (l/s)	Comments
CRC042020	SWDIVERT	M Horo	New application	23 Mar 2004	24 Mar 2005	174		174	
							<b>Subtotal for applications</b>	<b>174</b>	
							<b>TOTAL (existing + applications)</b>	<b>174</b>	

## Upper Omarama Stream Catchment

Please note these are in addition to those resource consents considered under Table 3, row x of the WCWARP.

## Manuka Creek

Consent application number	Activity type	Consent holder/ Applicant name	State	Date received	Notifiable date	Max rate of abstraction or diversion to include (l/s)	Max rate of abstraction or diversion not to include (l/s)	Running total (l/s)	Comments
CRC000002.1	SWTAKE	Killermont Station Limited	Existing			23		23
