May it please the Commissioners

1. The applicant has received the section 42A addendum report of Maria Bartlett, shown on Environment Canterbury's website as being dated 12 January 2010.
2. At page 32 of the report the Officer reviews the evidence and proposed amendments presented by the applicant at the hearing on the 11th of November 2009.
3. The applicant has no further submissions to make and notes that the revised conditions effectively adopt the applicant's proposals and evidence. Consent may be granted accordingly.

The Upper Waitaki Basin Dairy Applications

4. Counsel has the 15th minute of the Commissioners issued after the Minister for the Environment exercised his call-in powers in relation to the Five Rivers Limited, Southdown Holdings Limited, and Williamson Holdings Limited applications. This counsel does not wish to be heard in relation to Mr Whata's memorandum of 28 January 2010.
5. In deciding that the applicant does not wish to be heard on Mr Whata's memorandum, counsel records his understanding that there is no proposal that the Munro application not be determined pending the outcome of the upper catchment dairy applications. Counsel endorses paragraph 156 of Ms Barlett's report dated 12th January 2010 indicating that the Munro application may be granted and submits that this Committee may issue a consent quite independently of any decision made on the Five Rivers Limited, Southdown Holdings Limited, and Williams Holdings Limited applications.
6. Accordingly, counsel does not wish to be heard further.
