# **Community Focused Land Transport Activities Funding Process**

Nadine Milmine, Education Advisor

# Background

- From 1 July 2007, Land Transport NZ will fund approved organisations for community focused activities to meet local priorities
- Land Transport NZ will no longer direct fund activities via the Community Road Safety Programme
- Councils will apply for this funding in their annual application to Land Transport NZ

# Community Focused Activities

## Three work categories

- Community Coordination
- Community Programmes
- Community Advertising

# Local share component

- Land Transport NZ funds CFA at a 75% Financial Assistance Rate (FAR)

Councils can choose to...

- Fund an activity at 100%
- Pass on the 25% local share
- Form a partnership (e.g. in kind donations)

# How can others get involved?

- Some councils have a contestable “project fund” – talk to local RSC about application dates
- AO’s are interested in partnerships with agencies/groups – talk to your local RSC about what projects are coming up

- AO's submit a draft programme to Land Transport NZ in November each year. If you have a project or idea talk to the AO before this date.
- Keep in mind that Council activities are driven by LTCCPs.

# Questions about funding

- In first instance, talk to your Local Road Safety Coordinator
- More information about the funding process can be found in Handbook I and II on the Land Transport NZ website
