

## **6.9 Environmental results anticipated**

The implementation of policies and methods in this chapter is expected to achieve the following environmental results:

### **6.9.1 Environmental result anticipated BLR1**

No increase in the risk, as a result of activities within the beds and margins of lakes and rivers, to:

- (a) human safety;
- (b) habitats of significant indigenous flora or fauna;
- (c) Ngāi Tahu values;
- (d) natural character, outstanding natural features, or amenity values;
- (e) significant habitat of trout or salmon; or
- (f) property.

### **6.9.2 Environmental result anticipated BLR2**

No increase in the risk of bank or bed erosion, or undermining of structures as a result of activities within the beds of lakes and rivers.

### **6.9.3 Environmental result anticipated BLR3**

No increase in the rate of human induced spreading of pest plants in the beds of lakes and rivers.

### **6.9.4 Environmental result anticipated BLR4**

Greater level of community awareness of the risks posed by flooding, erosion and/or the inappropriate design or location of activities.

### **6.9.5 Environmental result anticipated BLR5**

No significant reduction in the amount of material supplied to the coast as a consequence of activities within the beds and margins of lakes and rivers.
