

# Wellington Regional Council Agrichemical Information

## Deregulated Agricultural Chemicals

The following pesticides have been deregistered (or registration refused) by the Pesticides Board.

Pesticide	Year of Deregistration	Reason
Chlordane	1992	Environmental impact
DDT	1990	Environmental impact
Dieldrin	1990	Toxicology, environmental impact
HCB	1972	Bioaccumulation
Lindane	1990	Environmental impact
Mirex	1990	Environmental impact
Organotin Marine Antifoulants	1991	Shellfish toxicity
Strychnine	1977	High mammalian toxicity
Sulfallate	1987	Suspected carcinogen

## Withdrawn Pesticides

The following chemicals have been voluntarily withdrawn by the proprietors following negotiations with the Pesticides Board over the availability and acceptability of current health and safety data.

Pesticide	Year	Reason Withdrawn
Arsenic compounds	1977	Environmental impact
Aldrin	1985	Toxicology, environmental impact
BHC	1962	Toxicology, environmental impact
Binapacryl	1988	Potential teratogenicity
Camphechlor	1976	Toxicology, environmental impact
Chlordimeform	1978	Possible carcinogenicity
Chlorobromopropane	1980	Possible carcinogenicity
Cyhexatin	1987	Potential teratogenicity
Dinoseb	1988	Toxicology
Endrin	1976	Toxicology, environmental impact
Heptachlor	1971	Bioaccumulation
Isobenzan	1965	Bioaccumulation
Leptophos	1976	Neurotoxicity
Mercurous chloride	1972	Environmental impact
Nicotine sulphate	1975	Acute toxicity
Nitrofen	1987	Teratogenic potential
Mercury compounds	1972	Environmental impact
Parathion	1986	High mammalian toxicity
Schradan	1976	High mammalian toxicity
TDE	1976	Environmental impact
