

Severely Restricted Pesticides

The use and availability of the following pesticides have been severely Restricted by the Pesticides Board.

Pesticide	Year	Reason Restricted
Pentachlorophenol	1991	Restricted to use on export dressed timber and only when applied using closed circuit "Prevac" treatment system. Registration however is pending subject to approval of a waste disposal protocol.
Captafol	1990	Restricted to use as a paste formulation for tree wound treatments. Potential carcinogenicity.
Ethylene dibromide	1984	Restricted for use for import quarantine fumigation for fruit fly only. Potential carcinogenicity.

Important Information

The chemicals listed are not always the name of the agrichemical, rather an ingredient. When checking agricultural chemicals on your property look at the ingredients to see if they contain any of these chemicals.
