WAIMAKARIRI RIVER REGIONAL PLAN PROPOSED PLAN CHANGE 1

Environment Canterbury

Report No. R09/78

ISBN: 978-1-877542-19-0

NOTE: This is a summary of the decisions requested by submitters. Anyone making further submissions should refer to a copy of the original submission rather than rely solely on the summary of decisions requested.

Where a decision requested by a submitter was unclear, Council staff, pursuant to Section 37 of the Resource Management Act 1991, contacted submitters and sought clarification. Where clarification information has not been received, Environment Canterbury staff have interpreted these submissions to the best of their ability, to identify the decision being sought.

Refer to the following pages of the Summary of Decisions Requested for the list of **Submitters and Addresses for Service**.

GUIDELINES ON HOW TO USE THIS DOCUMENT

This document contains a Summary of Decisions Requested (SODR). The Summary of Decision Requested conveys what changes to the Proposed Plan, if any, are being sought by the submitters. All submitters have been given a submission number and each decision requested is assigned a submission point number. The format of this document is arranged on a submission-by-submission basis. Accordingly, all decisions requested/submission points by the same submitter have been grouped under the same submission number.

To find the submission number for a specific submitter, refer to the list of ***“Submitters and Addresses for Service”*** later in this document (refer to Contents page).

Where new wording is sought by the submitter, this is quoted in *“italics”*. Specific changes to existing wording are highlighted “underlined” for insertions and ~~“striketrough”~~ for deletions. Note that deletions of any words or text are not always apparent, so comparisons with Waimakariri River Regional Plan Proposed Plan Change 1 may be required.

This is a summary of the decisions requested in the submissions only. For reasons, explanations and general comments given by submitters refer to the original submissions.

GUIDELINES FOR MAKING FURTHER SUBMISSIONS ON Waimakariri River Regional Plan – Proposed Plan Change 1

INTRODUCTION

This is the second stage of the public submission process when everyone has the opportunity to **support** or **oppose** decisions requested in the original submissions to Waimakariri River Regional Plan (WRRP) Proposed Plan Change 1. These comments are called **further submissions**.

Anyone is welcome to make further submissions to Waimakariri River Regional Plan Proposed Plan Change 1. However, these can only be made in **support of or in opposition to decisions requested in the original submissions**. You are not able to request new decisions at this stage.

HOW TO FILL OUT THE FORM

A further submission form has been provided on the following page for your use. Please **use a separate copy of the form for each submission** you wish to comment on. If you do not wish to use this form, please make sure that you follow the requirements of the submission form to provide the correct information.

The following guidelines are to assist you in making your further submission. They refer to each section of the form provided.

Part A

Name and address, contact phone/fax numbers etc and signature are important to validate the further submission and enable the Council to contact you. Print clearly giving full details.

Part B

After all submissions and further submissions have been analysed, the Council will hold hearings to listen to submitters who wish to speak to their submission. Tick the **first box** if you do not wish to speak at the hearings. Tick the **second box** if you would like to speak to your submission at these hearings.

If other people have made similar submissions you may be invited by the Council to contribute to a joint presentation at the hearing. Tick the **third box** if you are happy to do this.

Part C

Your further submission should be brief, concise and clearly referenced to the specific part(s) of the original submission. Steps (1)-(4) below refer to each column of the form in Part C. Follow these steps for **each** further submission you are making on WRRP Proposed Plan Change 1. All points raised relating to a particular original submission can be listed on the same page (for example if you are commenting on a number of submission points from one submitter). However a separate copy of the form is required for each original submission you make a further submission on.

(1) The original submission my further submission relates to is:

You must provide the name and address of the person or group making the original submission, together with the submission number that is clearly displayed on both the original submission and in the summary.

(2) The particular part of the original submission I am referring to is:

You can refer to either the entire original submission or to a particular point/s in the original submission. You may want to support some of the decisions requested and oppose others within the same original submission. Each decision requested must be itemised separately in columns (2), (3) and (4) for each decision requested raised.

(3) In this column use **S** or **O** to indicate whether you are supporting or opposing the decision requested.

(4) State concisely your reasons for support or opposition:

You must provide clear reasons why you wish to support or oppose a particular original submission. You must do this for every decision requested. You may not raise any new requests at this stage.

Part D

You are required under the Resource Management Act 1991 to send a copy of your further submission to the person or organisation whose original submission you have submitted on within **five working days** of sending the further submission to Environment Canterbury.

			requested.
50	Gavin Raymond Reed	1	Amend size of proposed gap between A and B blocks to between 10 and 15 cumecs.
		2	Amend proposed Plan Change to 1cumec:1cumec flow sharing for B block allocation.
		3	Amend proposed Plan Change to let only freshes between 130-200 cumecs pass without take, to let freshes pass only in the months from December to March, and to allow resumption of takes after 6 hours, not 24 hours.
		4	Amend proposed AA Block to 4.5 cumecs.
		5	Amend proposed minimum flow for A permits to 44 cumecs.
		6	Amend proposed minimum flow for B permits to 65.6 cumecs.
		7	Amend proposed shift to a new monitoring site so there is a 5 year monitoring period to establish relationship between Otarama and Old Highway Bridge.
		8	Establish a user group to establish the level at the new monitoring site.
		9	Amend terms 'above/below Woodstock' to 'above/below Otarama'.
		10	Contact consent holders on the river by fax and cell phone when river level changes need to be notified to them.
		11	Retain proposed A Block including separating out the AA Block.
		12	Retain proposed shift of flow recording site from the Old Highway Bridge to Otarama.
51	Tim Wardell	1	Amend by raising proposed minimum flow for the A block by 5 cumecs
		2	Amend by reducing proposed gap between A and B blocks by 5 cumecs
		3	Retain proposed protection of flow variability.
		4	Retain proposed 30 cumec gap between A and B block unless A block minimum flow is raised.
		5	Amend by reducing proposed B block to 25 cumecs on a 1:1 flow sharing basis.
		6	Retain proposed shift of flow recording site to Otarama.
		7	Add provisions to Plan Change 1 to stop granting further winter takes in future consents.
		8	Retain proposed initial conservative approach on Otarama reference levels.
52	Westacre Farm Ltd Attn: Chris Judd	1	Amend proposed B1 block to include 187L/s groundwater take from application CRC072416 (Westacre Farms Ltd).
		2	Delete (i) from proposed 'Rule 5.1 Standards and Terms'.
		3	Amend proposed 'Rule 5.1 Standards and Terms (d)(2), (e)(2) and (ee)(2) to read <i>"The flow minus the "minimum flow" for "A (B1) (B)" permits divided by the consented total for all currently used "A (B1) (B)" permits."</i>
53	Fish and Game Attn: Tony Hawker	1	Amend by reducing proposed B Block to 25 cumecs.
		2	Continue to use flow recorder at Old Highway Bridge as well as the proposed one at Otarama.

Waimakariri River Regional Plan – Proposed Plan Change 1 – Summary of Decisions Requested by Submitters

Subm. ID	Submitter name	Point No.	Decision Requested
		3	Initiate a review of the proposed A Block.
		4	Amend by setting proposed minimum flow for B Block at 109 cumecs at Otarama.
		5	Alternatively to point 4, retain proposed minimum flow for B Block at Otarama, where this can be shown to provide a similar level of protection to the river system.
		6	Retain proposed Plan Change 1, apart from the changes requested in points 1-5.
54	Waimakariri Irrigation Ltd	1	Retain proposed Policy 5.1 (2)(a), but only if numbers Table 2 are changed to ensure there is no decrease in reliability of supply to the submitter and any existing abstractors.
		2	Amend proposed Policy 5.1 Explanation to clarify that existing abstractors operating prior to 8 August are protected.
		3	Amend proposed Policy 5.1(2)(b) to read " <i>The taking of diverting of surface water, or the taking of hydraulically connected groundwater from the Waimakariri River, including all its tributaries shall be classified as a non-complying activity, where...</i> " Make associated amendments to the 'Policy 5.1 Explanation
		4	Amend proposed Policy 5.1(2)(c) to read " <i>(iii) The application is required to maintain the reliability of water supply to any consent holder that was lawfully exercising their consent prior to 8 August 2009</i> ". Make associated amendments to 'Policy 5.1 Explanation'.
		5	Amend proposed Plan Change by removing prohibited activity status from the plan.
		6	Retain proposed 'Rule 5.1 Standards and Terms' (d), but do not delete the words 'unmodified flow' from 'Rule 5.1 Standards and Terms'. Amend proposed 'Rule 5.1 Standards and Terms' at the end of clause (d)(2) to read: " <i>The allocation of "A" Permit water must be done in a way that does not reduce the reliability of supply to consent holders who have lawfully exercised their consent prior to 8 August 2009</i> ".
		7	Amend proposed 'Rule 5.1 Standards and Terms', at the end of clause (i), to read: " <i>The procedure for initiating this cessation of water shall include the following measures: 1) the Canterbury regional Council will consult with consent holders to ensure that the cessation of the water take minimises the disruption to their abstraction activities; 2) the Canterbury Regional Council will provide consent holders with seven days notice in advance of the likelihood of a cessation of the water take so that the consent holder can manage their water demand to accommodate the shutdown period; 3) the Canterbury Regional Council will notify consent holders immediately at the completion of the cessation requirement so as to minimise the period of cessation; 4) the Canterbury Regional Council shall not require abstractions to cease when the predicted flood event is expected to be sufficiently large that the impacts of abstractions are not likely to adversely impact on the flushing capacity of the flood; and 5) the Canterbury Regional Council shall ensure that the number of cessation events in any one season are minimised to achieve a balance of the needs of abstractors with the needs of the river</i> ".

		8	Amend the formula at the end of proposed 'Rule 5.1 Standards and Terms', clause (d)(2), to read: <i>"The "unmodified flow" minus the "Minimum Flow" for "A" permits that are being currently exercised"</i> .
		9	Amend proposed 'Rule 5.1 Interpretation of the Standards and Terms (including Table 2)' to include <i>"Unmodified flow is the rate of flow in the river at a flow monitoring site where the flow is corrected for any abstraction effects occurring at an upstream location"</i> .
		10	Amend second to last paragraph of 'Effect of Rule 5.1' to allow for a 5 year transition period and add to the end of the paragraph <i>"...unless the consent holder and Environment Canterbury agree on a flow allocation regime that does not reduce the consent holders' current reliability of supply"</i> .
		11	Amend second to last paragraph of 'Effect of Rule 5.1' by adding to the end of it: <i>"The review of conditions shall not reduce the reliability of water supply to consent holders who were lawfully exercising their consents prior to 8 August 2009."</i>
		12	Amend proposed AA Block by setting it at 4458L/s.
		13	Amend minimum flow for A permits by setting it at 43,900L/s.
		14	Retain proposed A block.
		15	Amend proposed minimum flow for B1 permits by setting it at 65,358L/s.
		16	Retain proposed shift of monitoring site to Otarama provided that the correct allocation limits are set at that site.
		17	Amend the second paragraph of proposed Rule 5.3 to read: <i>"(2) Within the area of the Waimakariri River Catchment "below Woodstock" defined in Figure 4 and Map 1, the taking of surface water or hydraulically connected groundwater that does not meet the standards and terms for Rule 5.1, and is not listed as discretionary activity, is a non-complying activity"</i> .
		18	Amend clause (b) in proposed Rule 5.4 to read: <i>"the damming of water in the main stem of the Waimakariri River from its source down to the Coastal Marine Area, with the exception of weirs or gravel banks that are required for abstraction intakes"</i> .
		19	Amend proposed Rule 5.4 by deleting clause (e) from it.
		20	Amend Schedule 1 to ensure that the Plan Change does not impose any obligation on those taking from an Irrigation Scheme to provide metering as set out in the Plan, but on the Scheme consent holder.
		55	Robert Hugh Williams
		2	Support 1:1 flow sharing above AA/A/B1 Blocks. No specific decision requested.
56	Ken Cookson	1	Withdraw proposed Plan Change 1.

			the definition to allow for abstractions upstream of the monitoring site.
		10	Retain the words "near the point of take" in 'Rule 5.1 Matters restricting exercise of discretion' or replace the entire 'Matters restricting exercise of discretion' with a new confined list.
		11	Retain B Block of 40 cumecs subject to amending the activity status for abstractions above this limit from non-complying to discretionary.
		12	Alter the minimum flow for B Permits from 104 cumecs to 75.72 cumecs provided the best fit correlation of flow between the Old Highway Bridge and Otarama flow measuring sites is used.
		13	Amend the allocation limit for B Permits to read <i>"40,000 provided that the flow in the river shall not be reduced by abstraction or diversion by more than half of the excess flow over the minimum flow"</i> . (i.e. 1:1 flow sharing sought).
		14	Use best fit relationship rather than worst case scenario for relationship between Old Highway Bridge and Otarama flow measurement sites.
		15	Delete proposed Rule 5.3(2) in full or reword and move to a discretionary activity.
		16	Delete proposed Rule 5.4(e)
		17	Delete the reference to 'gap' and the definition provided for this.
71	Ernest Barry Mathers	1	Increase proposed gap between A and B Blocks to 40 cumecs.
		2	Reduce proposed B Block to 25 cumecs
		3	Amend Plan Change to include a cap of 500L/s for any individual applicant.
		4	Amend Plan Change to include a cap of 10 cumecs for any group applicant.

Waimakariri River Regional Plan – Proposed Plan Change 1 – Summary of Decisions Requested by Submitters

Subm. ID	Submitter name	Point No.	Decision Requested
		5	Retain proposed change of flow recording site to Otarama, but continue monitoring at Old Highway Bridge.
		6	Retain proposed Schedule 1.
73	Horticulture NZ Attn: Chris Keenan	1	Withdraw proposed Plan Change and engage with all stakeholders prior to notification of an amended Plan Change.
		2	Alternatively to submission point 1, delete the 30 cumec gap between the A/B1 and B Blocks.
		3	Alternatively to submission point 1, delete the allocation cap for the B Block.
		4	State clearly throughout the WRRP that there will be no decrease in reliability for existing users.
		5	Amend proposed Plan Change so it does not contain rules and policies that prohibit water takes. Takes that are inconsistent with the proposed policies should be non-complying.
		6	Amend proposed provisions to let freshes pass without takes by balancing between the needs of the river and the needs of abstractive users. Allow consideration of recent irrigation restrictions due to low flows. No specific decision requested.
		7	Support metering requirements for abstractions. No specific decision requested.
		8	Give further consideration to a 1:1 flow sharing regime.
74	Trustpower Ltd and Rangitata Diversion Race Management Ltd	1	Amend proposed Policy 5.1.(2) to advocate in favour of an allocation regime that is justified by robust science and achieves the balance promoted by the Act.
		2	Amend proposed Policy 5.1.(2) to state that any application to abstract water that is a) non-consumptive or b) accords with the allocation regime will be classified as a controlled or restricted discretionary activity.
		3	Amend proposed Policy 5.1.(2) to state that any application to abstract water that is consumptive and that does not accord with the allocation, flushing flow or minimum flow regime is a full discretionary or non-complying activity.
		4	Amend proposed Policy 5.1.(2) to enable the consideration of applications to abstract/divert water that accord with the circumstances set out in subsection (c) and (d) of Policy 5.1 in a combined subsection.
		5	Amend proposed Policy 5.1.(2) to make it plain that the allocation regime reflects the 'first in, first served' and the 'last in, first out' principles.
		6	Amend proposed Plan Change by inserting an appropriate definition of the term 'non-consumptive'.
		7	Amend proposed Explanation of Policy 5.1 to reflect the approach sought in submission points 1 to 6.
		8	Amend proposed Method 5.3.3 to state that the opportunity cost of foregone development, and broader social and economic cost of the proposed allocation regime and minimum flow/flushing regime will be monitored and reported.
		9	Amend proposed Standards (d)(2), (e)(2) and (ee)(2) of Rule 5.1 by replacing with rules that clearly

			state that the 'last in, first out' principle will apply when abstractions and diversions are being reduced in times of low flow.
		10	Amend proposed Standard (g) of Rule 5.1 by replacing with a rule that sets defined rates of groundwater abstraction for prescribed (mapped) areas/sub-catchments.
		11	Amend proposed Standards (i) of Rule 5.1 by replacing with a rule that comprehensively defines how a) water user groups will be formed, b) a water sharing regime will be developed and confirmed/approved, and c) how re-allocation between users can occur and what constraints will be imposed to ensure that the re-allocation does not derogate from another resource consent.
		12	Amend proposed Plan Change by inserting an appropriate definition of the term 'water user groups' and 'water sharing regime'.
		13	Amend proposed Standard (i) of Rule 5.1 to exempt holders of existing consents.
		14	Amend proposed Table 2 to provide an allocation and minimum flow regime that is cognisant of all aspects of the environment and better achieves the purpose and principles of the Act. As a minimum, preserve the present level of reliability for existing consent holders for the duration of their consents.
		15	Amend proposed Rules 5.3(2) and 5.4 with rules which: i) make all proposed non-consumptive abstractions or diversions of water below 'Woodstock' a controlled activity; ii) make all proposed consumptive abstractions or diversions of water that accord with the minimum flow and water allocation regime a restricted discretionary activity below 'Woodstock'. iii) make all proposed consumptive abstractions or diversions of water below 'Woodstock' that do not accord with the allocation regime and/or the standards in Rule 5.1 a full discretionary activity; iv) make all proposed consumptive abstractions or diversions of water below 'Woodstock' that do not accord with the minimum flow regime a non-complying activity; v) make all proposed non-consumptive abstractions or diversions of water above 'Woodstock' a fully discretionary activity; vi) make all proposed consumptive abstractions or diversions of water above 'Woodstock' a non-complying activity; vii) make small dams below 'Woodstock' a restricted discretionary activity; viii) make all moderate to large dams below 'Woodstock' a full discretionary activity; ix) make small dams above 'Woodstock' a full discretionary activity; x) make all moderate to large dams above 'Woodstock' a non-complying activity;
75	Drumnacott Farm Attn: Graeme and Lindsay Hewitt	1	Withdraw proposed plan change.
76	NZ Salmon Anglers Assn (inc)	1	Retain the proposed 30 cumec gap between A and B Blocks.

		7	Delete proposed 'Policy 5.1 Explanation', paragraph 4.
		8	Delete proposed amendment to 'Method 5.3.3 Investigations', unless the monitoring has clear aims and objectives and the cost of the monitoring is borne by the beneficiary or beneficiaries.
		9	Delete proposed 'Rule 5.1 Standards and Terms' (i).
		10	Delete proposed amendment to 'Rule 5.1 Notification'.
		11	Delete the proposed amendments to the Effect of Rule 5.1 which do not refer to the proposed relocation of the flow measuring site.
		12	Amend the Plan to recognise that domestic and stock water is provided for under s14(3)(b) of the RMA and is not subject to the flow and allocation regime in Table 2.
		13	Retain proposed minimum flow for "A" Permits, provided the adjustment of minimum flow correctly accounts for losses and gains between the Old Highway Bridge and Otarama.
		14	Retain proposed allocation limit for "A" Permits, provided that existing consent holders are in no way disadvantaged.
		15	Retain proposed minimum flow for "B1" Permits, provided the adjustment of minimum flow correctly accounts for losses and gains between the Old Highway Bridge and Otarama.
		16	Retain proposed allocation limit for "B1" Permits, provided that existing consent holders are in no way disadvantaged.
		17	Reduce the minimum flow for "B" Permits to match the upper limit of the "B1" Permit allocation block.
		18	Remove the allocation limit for "B" Permits.
		19	Retain proposed deletion of Old Highway Bridge and amend flow recording site to Otarama, provided the adjusted minimum flows correctly account for the losses and gains between the two sites, and amend the numbers in Table 2 to reflect the best fit relationship between the two sites.
		20	Delete proposed Rule 5.3(2).
		21	Retain proposed Rule 5.4(e)(i) provided that: the minimum flow is appropriately set; it is

			acknowledged that domestic and stock water is provided for under s14(3)(b) of the RMA and is not constrained by the limits in Table 2; and the activity is non-complying rather than prohibited.
		22	Delete proposed Rule 5.4(e)(ii).
83	Te Runanga o Ngai Tahu Attn: Paul Horgan	1	Retain Proposed Plan Change 1 in its present form, with the exception of the amendments proposed in submission points 2 – 5.
		2	Reduce the size of the "B" Permit allocation to 25 cumecs.
		3	Amend 'Method 5.3.3 Investigations' to include a provision for cultural health monitoring.
		4	Amend Objective 5.1 by adding the following: " <i>(i) maintaining and enhancing the mauri of the Waimakariri River</i> ".
		5	Support proposed change of flow recording site from Old Highway Bridge to Otarama but retain Old Highway Bridge recorder and, over time, relocate to a site not influence by tidal processes.
84	Freshwater Ecology Research Group Attn: Dr Jon S. Harding	1	Support all proposed amendments to the Policies, Methods, Rules and figures in Proposed Plan Change 1 - no specific decision requested.
85	Chiswick Farm Ltd Attn: John Donkers	1	Delete or amend the "Gap".
		2	Delete the proposed "B" Permit allocation of 40 cumecs.
86	Ngai Tahu Property Ltd Attn: Edwin Jansen	1	Support Policy 5.1 provided ECan reviews the classification of A permit consents that are considered to be "hydraulically connected".
		2	Oppose the "prohibiting of any water takes" in Policy 5.1(2)(b) - no specific decision requested.
		3	Amend Policy 5.1(2)(d) by replacing the term "existing abstractors" with the term "existing permit holders" or "existing consent holders".
		4	Do not support the removal of the term "unmodified flow" - no specific decision requested.
		5	Support shifting the flow recording site to Otarama - no specific decision requested.
		6	Use the following flow relationship between the unmodified flow at Otarama and Old Highway Bridge: Flow at Otarama = flow at OHB + Groundwater recharge - Kowai River flow.
		7	Amend Table 2 by changing to a monthly minimum flow regime according to the table provided under 3.6.5, page 9 of the submission.
		8	Support the retention of a B1 Block of 1720L/s - no specific decision requested.
		9	Recommend suspending the gap for 21 days after a high flow event in excess of 130 cumecs.
		10	Recommend ECan review the relevance of classifying groundwater takes as 'A' permit takes and to compress the 'B1' permits into an enlarged 'A' permit Block with a lower minimum flow.
87	The Royal Forest and Bird Society of New Zealand Inc Attn: Chris Todd	1	Retain proposed amendment to 'Policy 5.1 and Explanation'.
		2	Retain proposed amendment to 'Method 5.3.3 Investigations'.
		3	Delete the words " <i>up to</i> " from proposed 'Rule 5.1 Standards and Terms' (i).
