

9.0 Acknowledgements

Preparation of these guidelines were supported by the Ministry for the Environment through the Sustainable Management Fund (Project number 8057). The project has also received support through the provision of field data, modelling assessments and technical review, from the Environment Canterbury, Wellington Regional Council, Tasman District Council, Marlborough District Council and Hawkes Bay Regional Council. The assistance of the groundwater staff in all these Councils is gratefully acknowledged. In addition, Dr Bruce Hunt of the University of Canterbury has provided a significant technical input to this project through his derivation of analytical solutions to the stream depletion question.
