

Community Partnerships Strategy Hapori Whakakotahi

ENVIRONMENT CANTERBURY PARTNERS WITH COMMUNITY ORGANISATIONS FOR ENVIRONMENTAL OUTCOMES

OUR PRIORITIES, TŌ TĀTOU KAUPAPA MĀTUA FRESHWATER MANAGEMENT AND INDIGENOUS BIODIVERSITY.

We manage Canterbury’s natural resources in an integrated, comprehensive and forward-looking way.

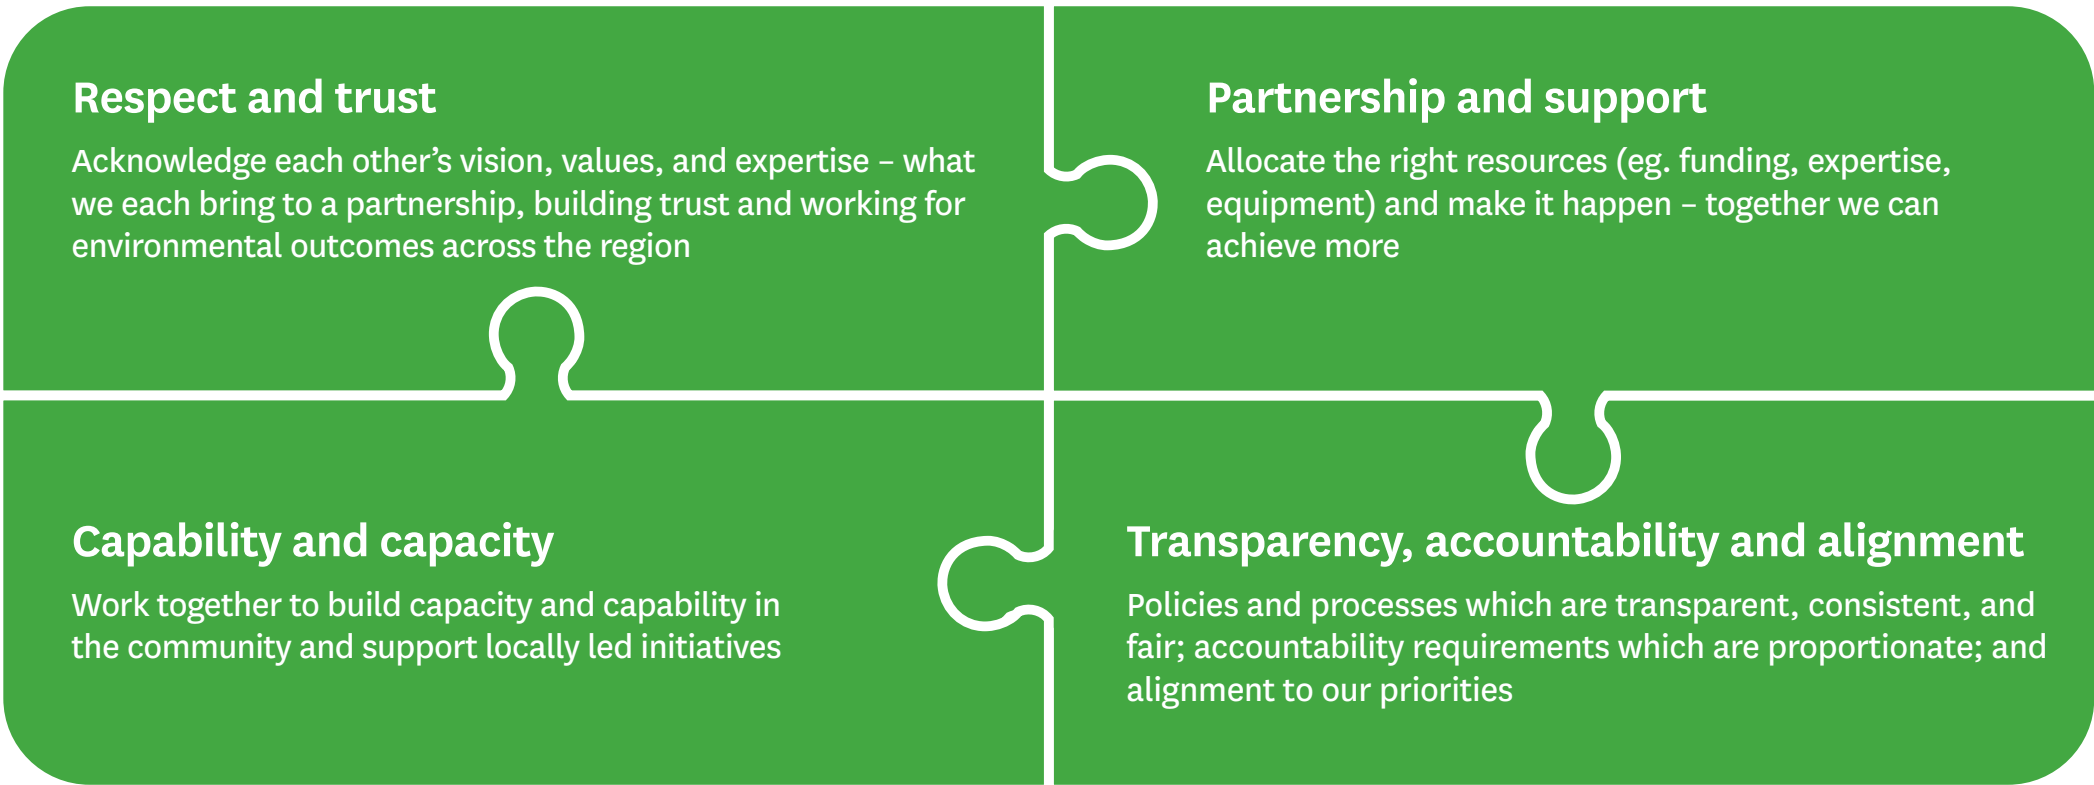

In all our work, we stand shoulder to shoulder with mana whenua, Ngāi Tahu.

This is our strategy for working in partnership with environmentally focused community organisations to deliver on Environment Canterbury priorities. It sets out how we will work together and what success looks like.

WE WELCOME OPPORTUNITIES TO WORK ALONGSIDE COMMUNITY ORGANISATIONS

Here in Canterbury, we work closely with community organisations, mana whenua, businesses, industry sectors, schools, health boards and other organisations and people. When we work together, we can achieve the outcomes we all want for the region.

HOW WE WORK TOGETHER

WHAT SUCCESS LOOKS LIKE

Our strategy draws on the experience of our staff along with feedback from around 25 community organisations through the Greater Christchurch Networking for the Environment Forum in 2017 and 2018.

We have a dedicated Community Partnerships Coordinator who can assist groups wishing to work with us.
